

SEMANTIC HTML

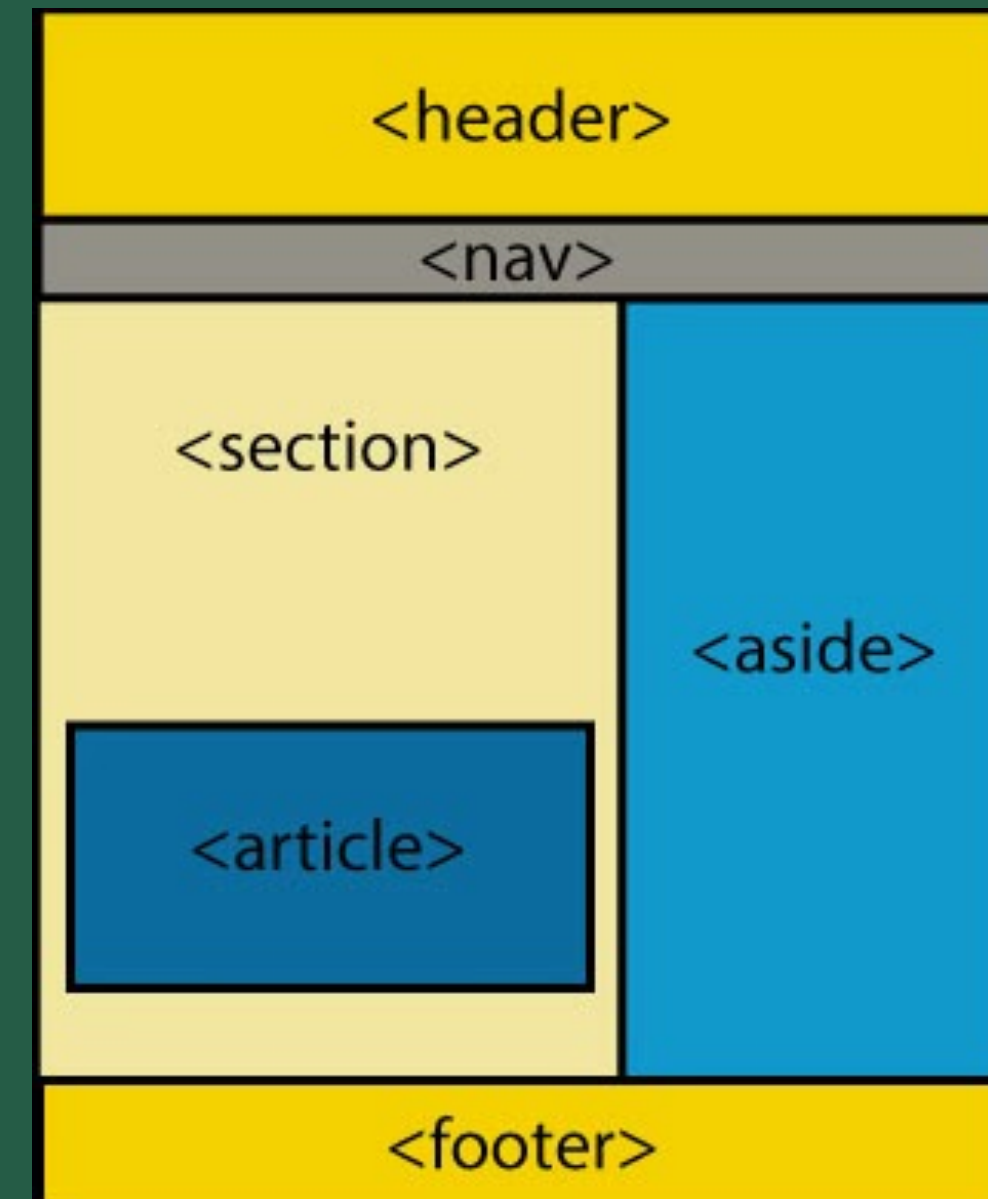

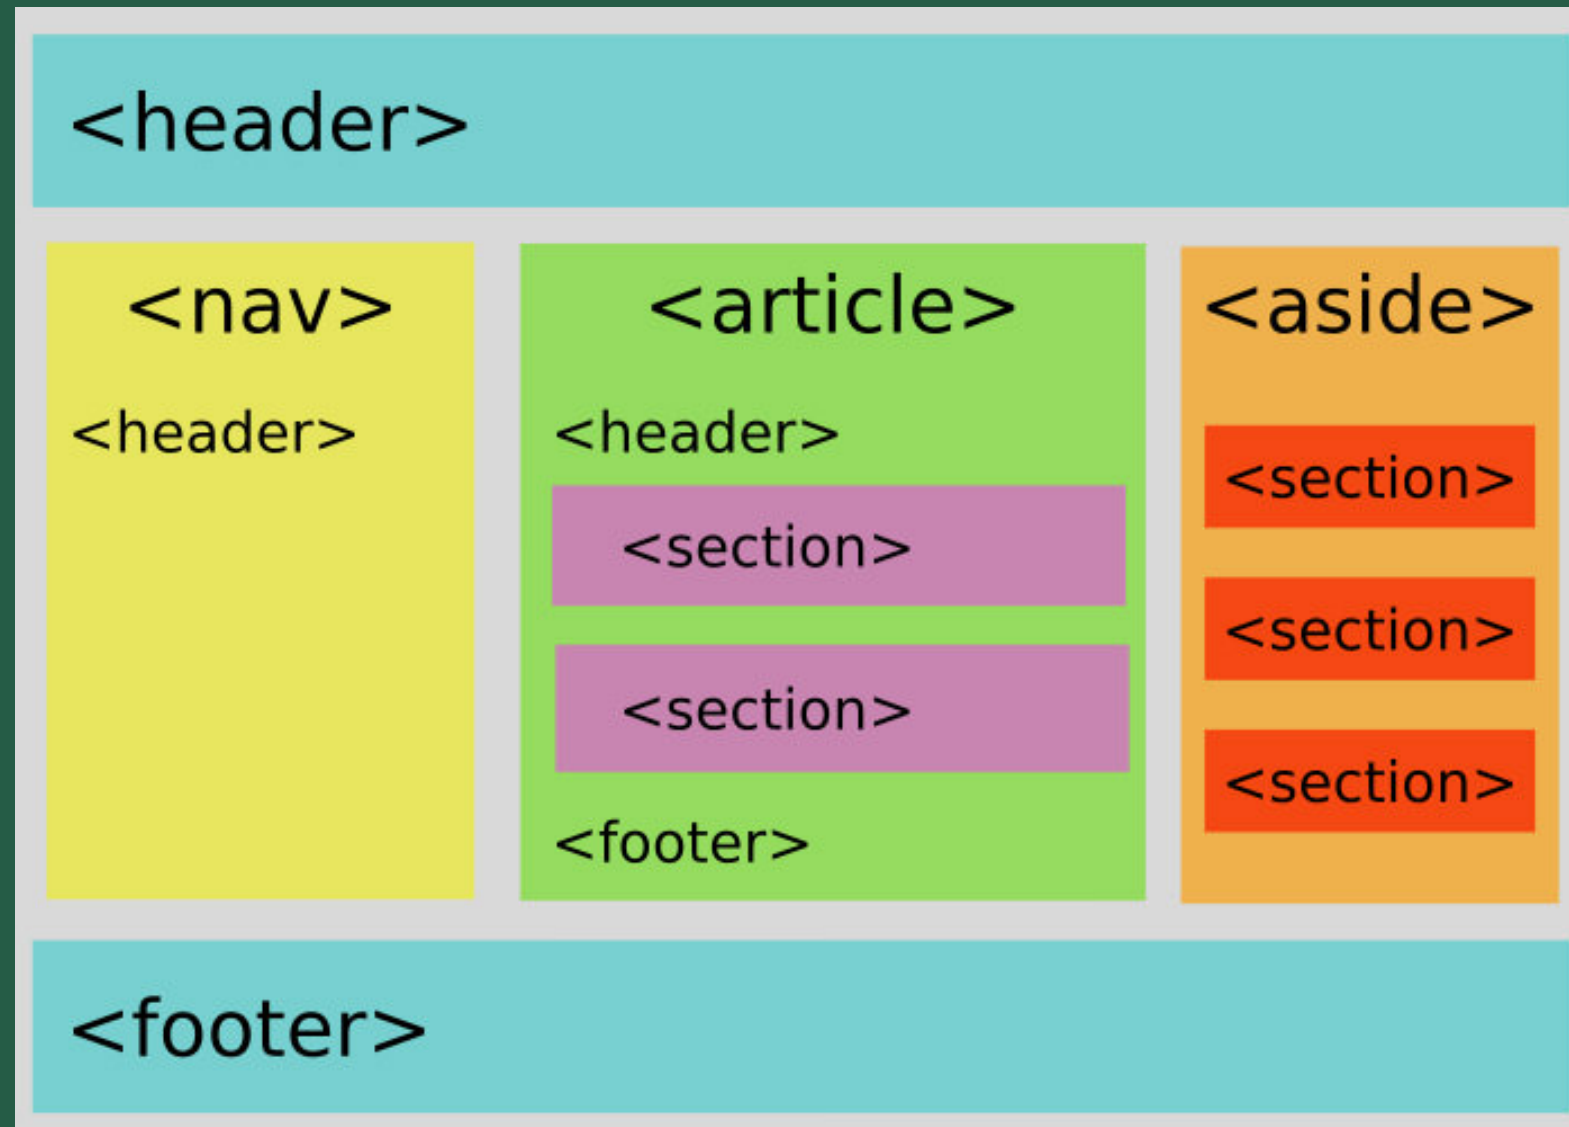

IMPORTANCE

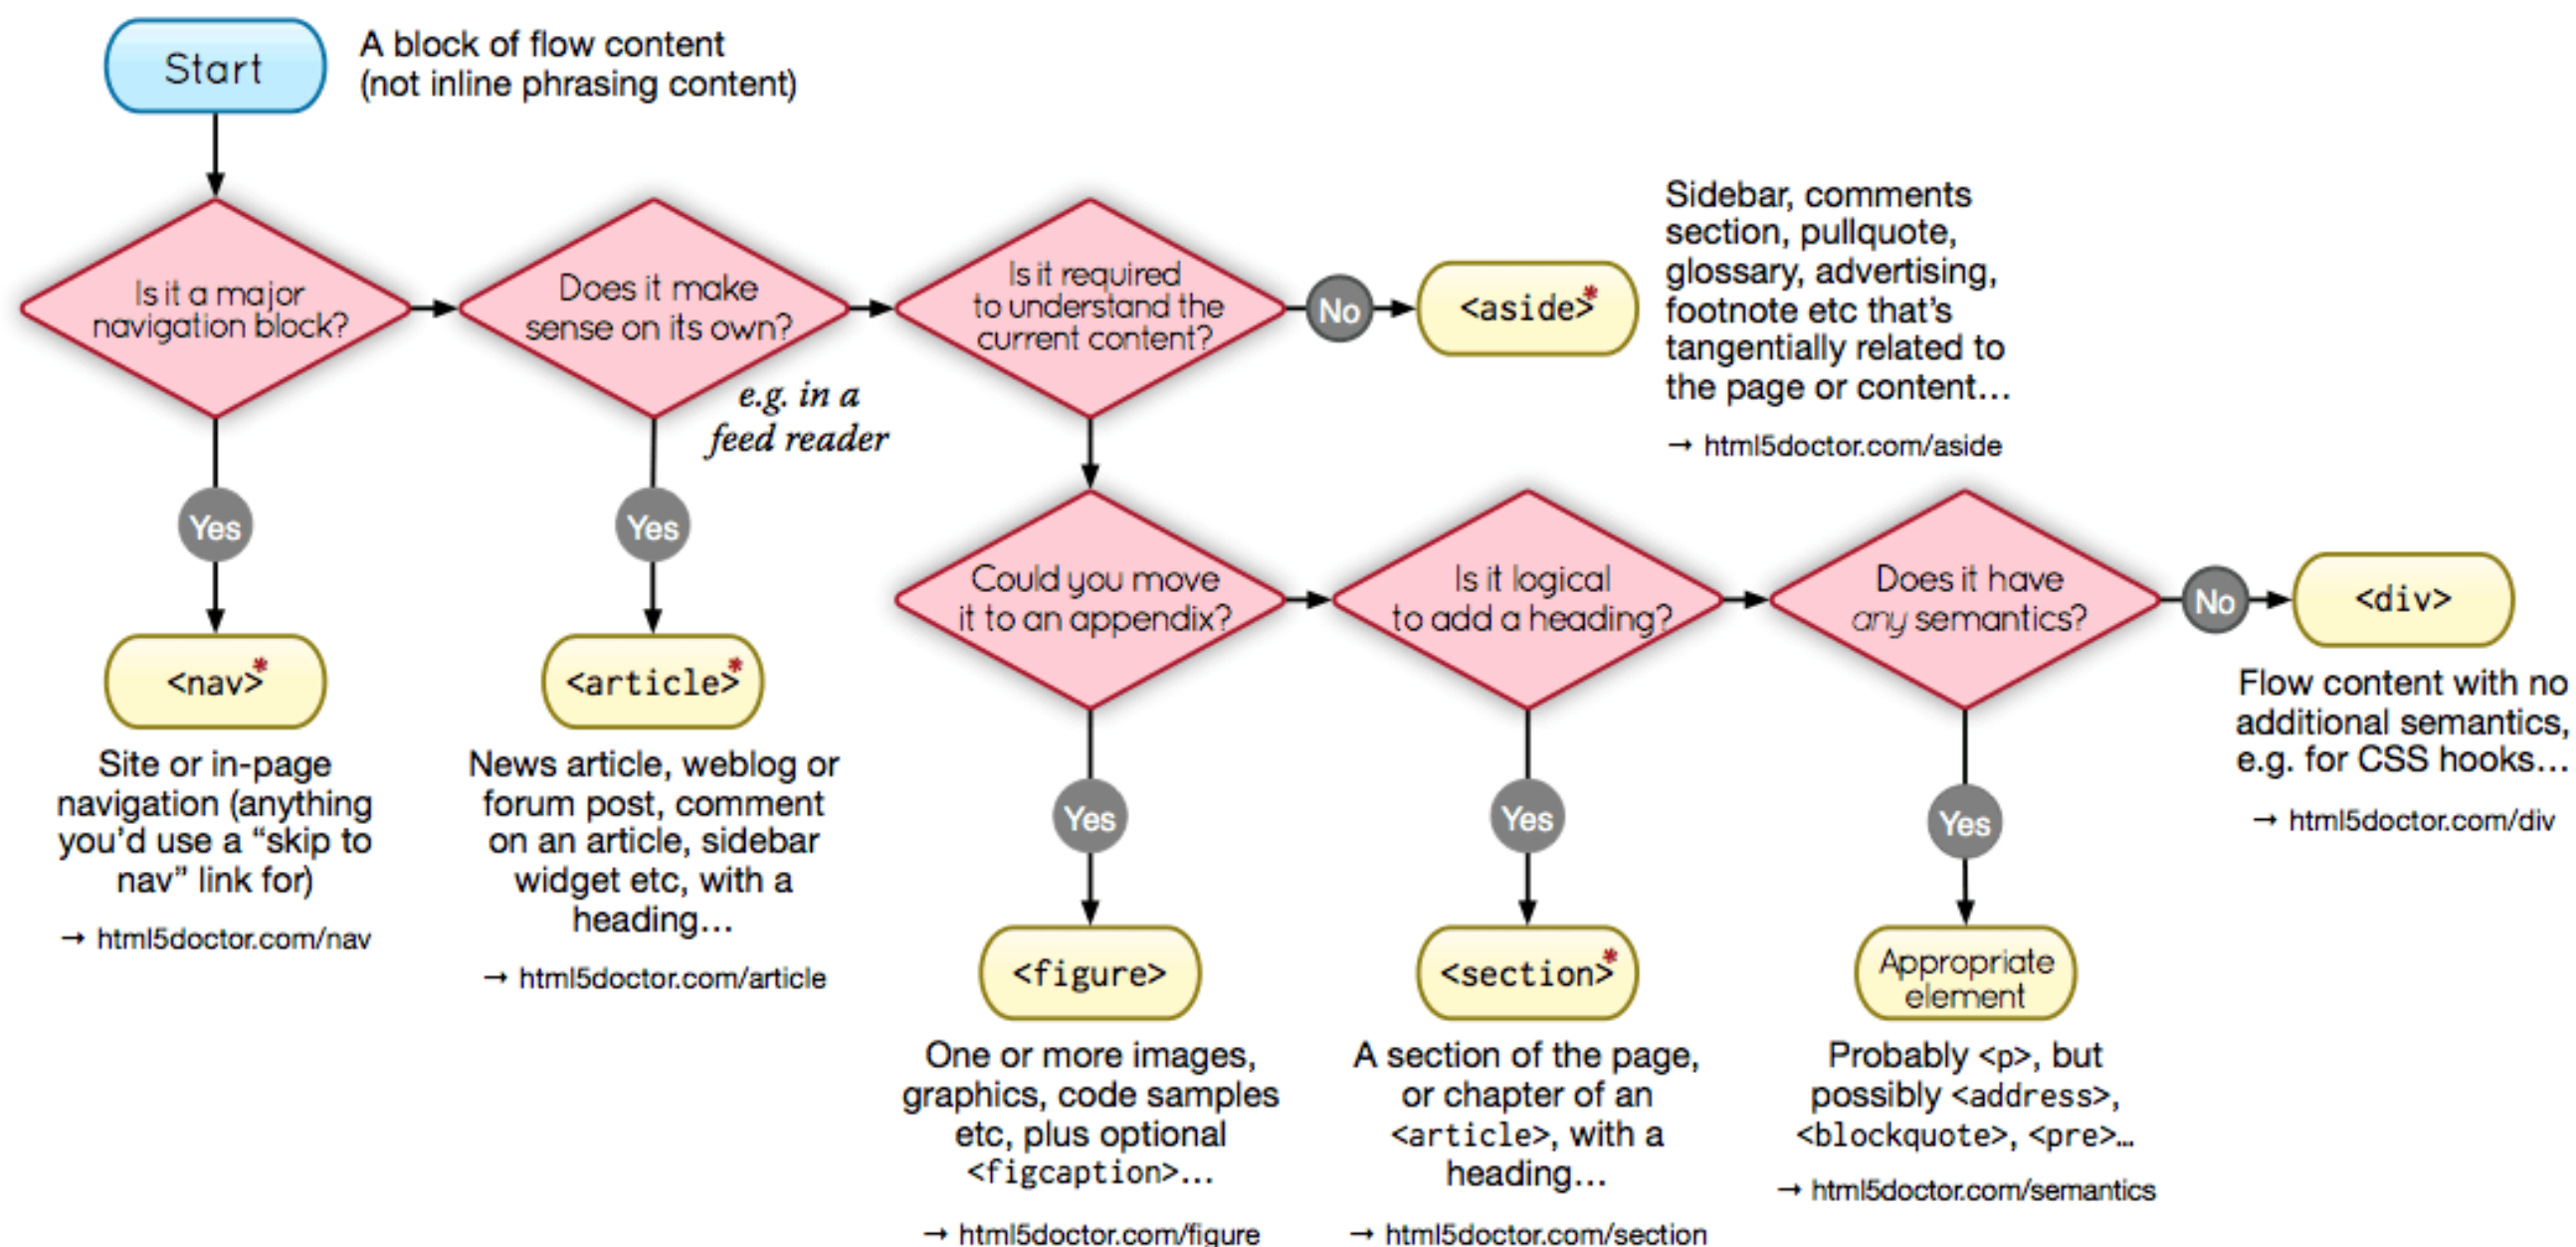

- > READABILITY
- > ACCESSIBILITY
- > SEO (SEARCH ENGINE OPTIMIZATION)
 - > CONSUMABILITY
- > SEPARATION OF CONCERNS

STRUCTURAL SEMANTIC TAGS

- > HEADER
 - > MAIN
 - > FOOTER
 - > NAV
 - > ASIDE
- > SECTION
- > ARTICLE

SECTION VS ARTICLE

* Sectioning content element

These four elements (and their headings) are used by HTML5's outlining algorithm to make the document's outline

SAMPLE CODE

```
<div id="blog-articles-about-animals">

  <section>
    <h1>Articles about Turtles</h1>
    <article>
      <h2>Where Turtles Live</h2>
      <p>blah blah</p>
    </article>
    <article>
      <h2>What Turtles Eat</h2>
      <p>blah blah</p>
    </article>
  </section>

  <section>
    <h1>Articles about Chickens</h1>
    <article>
      <h2>History of Chickens in USA</h2>
      <p>blah blah</p>
    </article>
    <article>
      <h2>Chickens in the Wild</h2>
      <p>blah blah</p>
    </article>
  </section>

</div>
```

LET'S PRACTICE!
